

## Li-Ion Batteries: Materials Characterization Service

Materials Analysis

### Why Work with Us?

**Expertise in LIB Materials Analysis**  
Highly experienced with advance technology

**Affordable Price**  
Up to 40% lower than industry pricing

**Free Consultation**  
Before and after service

**In-Depth Data Interpretation**  
As a second opinion to yours

**Quality Assurance Program**  
Free remeasurement if not satisfied

### Advanced Applications

**Objective**

**Solution**

Solid Electrolyte Interface Analysis

XPS

Atomic Level LIB Materials Evaluation

TEM-EDS

Nanoscale Chemical LIB Mapping

ToF-SIMS

3D Evaluation of Separator

X-Ray

### Li-Ion Battery Applications

<b>Cathode</b>	<b>Structure, composition, stability &amp; elemental distribution</b> BET, FTIR, ICP-OES, Nano-SIMS, SEM-EDS/FIB Cross-section, TEM-EDS/EELS, TGA-MS, ToF-SIMS, XRD, and XPS
<b>Anode</b>	<b>Structural characterization, thermal stability</b> BET, FTIR, ICP-OES, Nano-SIMS, Raman, SEM-EDS/FIB Cross-section, TEM-EDS/EELS, TGA/DSC, ToF-SIMS, XRD, and XPS
<b>Separator</b>	<b>Morphology, porosity, stability</b> AFM, FTIR, SEM-EDS, XRD, Tensile strength, TEM-EDS/EELS, TGA/DSC, and X-ray 3D CT
<b>Electrolyte</b>	<b>Elemental and compound impurities</b> GC-MS, ICP-OES, LC-MS/MS, and XPS

## X-Ray Photoelectron Spectroscopy

Identify the chemical environment of oxygen

## ToF Secondary Ion Mass Spectrometry

Cathode-electrolyte interface analysis

## X-Ray Diffraction

Crystal structures of electrode material

## Fourier-Transform Infrared Spectroscopy

Determination of residual Li-ion

## FIB Scanning Electron Microscopy

Morphology evolution

## (Cs- or HR-) TEM with EDS/EELS

Nanoscale chemical mapping of cathode

## Laser Diffraction

Particle size distribution

## Electron Back-Scatter Diffraction

Electrode particle architecture
